## Abstract

**Background:** Tourism contributes to the country's foreign exchange earnings. Sustainable development must be improved to have a real impact on the development of the economy and the welfare of the nation. Including the development of tourist villages.

**Purpose:** This study aims to determine the impact of tourism village development on socio-cultural, economic, and environmental aspects.

**Methodology:** The research is quantitative, with a descriptive verification approach. Sample determination uses non-probability sampling techniques. A sample of 100 respondents consisting of business actors, tourism village managers, village youth and other members of the general public. Data were collected through in-depth interviews, questionnaires, and observations and processed and analyzed using different tests.

**Results:** The study found differences between before and after the development of tourist villages. Economic, social, cultural, and environmental aspects increased compared to before and after the development of tourist villages.

**Keywords:** development of tourist villages, community-based tourism, socio-cultural, economic-environmental, sustainability.
